This is the information [www.usavaluesII2.com](http://www.usavaluesII2.com) The FED has the currency for a new deal for "urban" mom. It will trigger the growth delivered by the private sector for the equal start of age 0-6 children. The Federal Reserve Banks are the proxy for the private sector and only they decide who benefits from their Monetary Policy.

Purchase a reminder to quarterly point out to the Federal Reserve Banks in an email march of sorts that the private sector proxy is the Federal Reserve Bank. Its Board of Governors is the only organization large enough to give the gift of early reading skills to urban mom for her children. They don't want to hear this but they know it is true.

So what would the Federal Reserve Banks do with 1,000,000 emails telling them how important they are to equality.
